THE BARBER'S NEW BOY

A Few Words of Advice to Him and to Older People.

"Got a new boy in the shop this week. He's going to learn the trade. Teaching boys the trade is a specialty of mine. I like it, and, though the boys are not so well pleased, I have noticed that they become good workmen and good cit zens. knows everybody seems to talk too much. If you can't beat a man at an argument call him a crank. But don't argue. When a man argues his brain all rushes to one side of his head, and the contrary side at that. A man was never convinced of anything by argument excepting of his own eleverness and t'other fellow's stupidity. Men change their polities and their beliefs only as they do their shirts-when they are alone. The man who talks much and easily may seem to be the smartest, but about the time he gets tired the man who has been lying back in the chair thinking puts in a few words that knock the other man out. Education is a good thing, but too often it is a mere sugar coating to hide ignorance. The best education is that which teaches a man how little he knows of the much there is to learn and shows him the way to think. The educated man is an amateur, while the thinker is a professional.

flatter an intelligent man you must be very careful. It is a delicate operation, and your flattery must be administered as cautiously as your lather is. Every man likes a little soft soap if you keep it out of his eyes. You can always flatter a man by intimating that he is handsome. Every man will believe you, for no man knows whether he is goodlooking or not. A large majority of men, however, have a suspicion that they are. It is different with a woman. She knows all about it, and if not careful in trying to compliment her you will make yourself ridiculous in her eyes. It is always safe to admire her clothes. Be a politician only for an hour every election day. The man who spends most of his time trying to get an office is usually good for nothing else, and not often for that. The cheapest man on earth is the office-seeker. He feeds himself with hope on a fork and thinks he is getting fat. Be ambitious, but remember that man has no wings. EX-CONFEDERATES.

Closing Scenes of the Reunion of the Missouri Ex-Confederates.

Patriotic Address By President Price-The Work For the Association to Do-Tribute to General Grant -We Have Peace.

Louistana, Mo., October 15,-Last night, just as the citizens of Louisiana were seek ing repose from a day of exciting interest, the roar of artillery broke the silen e and reverberated with many echoes from the surrounding hills. The old soldiers, who sat around in the hotels and in places of public resort, sallied out in groups, and, locating the sounds, hurried to the river's bank, where they found some old associates of the artillery firing thirteen rounds as a " Jimmy, says I, when you want to salute to the citizens of Louisiana. Captain Gimbar, Captain Barlow, Lieutenant Hennessey, Michael Haughey and Sergeant McMahon were handling a twelve-pounder in the old style of neatness, but instead of sending out the death-dealing missile were firing a friendly salute. The scenes on the Gring a friendly salute. The scenes on the Carroll were inspiriting in the welcome to the delayed members. By nine o'clock this morning the boat was thronged and the landing lined with citizens and visitors, and about ten o'clock a procession was formed headed by Kuehn's band, which had come up with the Southern Historical Society. It was headed by President Price and Chief Marshal McCulloch, and marched through the principal streets, which were thronged the principal streets, which were througed on either side with a multitude, reaching the Opera House about eleven o'clock, Sens'or Ball explained the reasons for the non-arrival of the St. Louis delegations, and then introduced President Price, who delivered the following address:

PRICES' ADDRESS.

PRICES ADDRESS,

MR. MAYOR, LADIES AND GENTLEMEN—In behalf of the ex-Confederate Association of Missouri I thank you for your kindly words of welcome with which you have greeted us on our assembling to day in your beautiful and prosperous city.

Our enjoyment of the occasion is greatly enhanced by the critzens of Louisiana, who, irrespective of political opinions or affiliations, have made such ample arrangements for our accommodation and comfort.

We desire to express our heartfelt thanks for the kindness shown us by the Union veterans participating in our meeting and grateerans participating in our meeting and gratefully acknowledge their solderly magnanimity and courtesy.

To the ladies who grace our meeting with their presence we tender our most respectful acknowledgments for the honor they confer, and assure them that as the protection of women is at all times the soldier's most sacred duty, so in war or peare her sympathy and approval are the sweetest rewards of his courage and lidelity.

having been omitted from prodential consi erations.

Our Constitution wisely provides that no question of politics or religion shall be brought before or discussed by any meeting of the association. In view of this, and to goard against any violation of the letter of the spirit of the rule, and to avoid the missise from a meeting of ex-confederates during a heatest Presidential campa-ga, the council of administration, on mature deliberation, thought it for the best interests of the society and the public, that the reunion of 1834 should not be held, and fully concurring in this opinion, I omitted to call you together. From similar considerations I was induced to abandon the purpose I had formed and announced to canvas the State last fall and endeavor to perfect a more general interest in oursuccess.

I am happy to assure you that these sacrifices to expediency have worked no serious injury to the Association, and congratulate you on the gratifying progress that has been made during the past two years in carrying out some of the main purposes of our organization. The cemetery at Springfield has been substantially fenced at an expense of about \$5,000 and its condition is not some of the main purposes of our organization. In this connection let me say that the time may come when the people of the North and South, claiming equal shares in the glory re-flected on the Nation by the heroism of each will make equal provision for the poor and d sabled soldiers of both. As evidence that disabled soldiers of both. As evidence that the possibility, at least, of this consummation is beginning to be recognized at the North, I quote the following paragraph from an editorial article in the current number of the Century. "We have on our desk a letter from a member of the Grand Army of the Republic, who, while generously commending the spirit of our recent editorial on 'Twenty Years After the War,' goes on to propose that the general government should establish and maintain houses for needy and disabled ex-Confederate soldiers whose wounds were received at the hands of Unite! One of the special objects of our Association is the collection and publication of facts necessary to per etuate faithfully the great events in which its members have participated. I have to regret that as yet we have been unable to accomplish much in this respect. It is obvious that the cause of our failure in this regard is due in a great measure to the nature of our organization. Our members and committees are widely scattered, our meetings are held at such long intered, our meetings are held at such long in the long in the such same and are necessarily of such short. dier who makes it." tervals and are necessarily of such short duration that but little, if any opportunity is afforded for systematic work in this di-

Water in the Soil. As soon as rain-water enters the soil it becomes very different from its character when falling through the air. If particles of soil contain nitrogen, phosphorie acid, or potash in soluble condition, the water at once appropriates these, and holds them until drawn upon by growing plants. Hence treepent watering is a partial substitute for manuring. In a moist growing season, any soil, except one absolutely sterile, will furnish considerable plant food. Experiments made in growing trees in pure sand, kept wet by water procured by distillation, seem to show that water in the soil has some power in disintec-

CHICAGO

Life in the Paris Sewers is possible, for a short time, to the robust, but the majority of refined persons would prefer immediate death to existence in their recking atmosphere. How much their reeking atmosphere. How much more revolting to be in one's self a living serger. But this is actually the case with those in whom the inactivity of the liver drives the refuse matter of the body to escape through the longs, breath, the pores, kidneys and bladder. It is astonishing that life remains in such a dwelling. Dr. Pierce's "Golden Medical Discovery"

FOR THE CURE OF Or CHILLS and FEVER.

AND ALL MALARIAL DISEASES. The proprietor of this celebrated medicins

justly claims for it a superiority over all remedies ever offered to the public for the SAFE. CERTAIN, SPEEDY and PERMANENT cure of Ague and Fever, or Chills and Fever, whether of short or long standing. He refers to the entire Western and Southern country to bear him testimony to the truth of the assertion that in no case whatever will it fail to cure if the directions are strictly followed and carried out. In a great many cases a single dose has been sufficient for a cure, and whole families have been cured by a single bottle, with a per-fect restoration of the general health. It is, however, prudent, and in every case more certain to cure, if its use is continued in smaller doses for a week or two after the disease has heen checked, more especially in difficult and long-standing cases. Usually this medicine will not require any aid to keep the bowels in good order. Should the patient, however, require a cathartic medicine, after having taken three or four doses of the Tonic, a single dosa of KENT'S VEGETABLE FAMILY PILLS

will be sufficient. Use no other. DR. JOHN BULL'S SMITH'S TONIC SYRUP. BULL'S SARSAPARILLA.
